

Main menu – start programs, log out, change settings

Window list

Indicators and Notification Icons

Clock and Calendar

Workspaces

Shut down, lock screen, log out etc.

Your documents and settings are stored in your Home folder, or in folders within there.

CD-ROMs and USB drives will appear on the desktop. Double-click to mount and open them. Right-click the icon and click Eject or Unmount before removing the disks!

A shortcut bar appears if you touch the bottom edge of the screen with your mouse pointer.

Messaging menu
– mail, social
networking and
chat

Networking menu –
use to connect to
wireless networks.

Clock. Click for a
handy monthly
calendar.

Who's logged
in? Also,
clicking lets you
log out, shut
down, restart
and lock the
computer.

Power
management
– see how
battery's doing
and whether
you're on
mains.

Sound menu – adjust
volume, launch music
player, and access its
basic controls (play,
pause, next, previous)

Bluetooth – your mileage may
vary.

More than one workspace
allows you to have two
different sets of windows open
and switch between them.
The one you're on is
highlighted in blue.
